DETAILED ACTION

Information Disclosure Statement

1. The IDS filed on February 18, 2004 is hereby acknowledged and has been placed of record. Please find attached a signed and initialed copy of the PTO 1449. It was noted that Applicant also submitted a copy of the IDS filed in the parent application (10/256,428) and a copy of the PTO-892 made of record in the aforementioned parent application. Since the IDS filed on February 18, 2004 for the present application includes all of the references made of record in the parent application, the Examiner has lined-through the citations on the also-submitted parent application IDS and parent application PTO-892, in order to prevent these citations from appearing twice on the first page of a patent granted from the present application.

Ex parte Quayle

2. This application is in condition for allowance except for the following formal matters:

PRIORITY

3. Acknowledgment is made of applicant's claim for priority under 35 U.S.C. 119(a)-(d) based upon an application filed in Germany on March 29, 2001. A claim for priority under 35 U.S.C. 119(a)-(d) cannot be based on said application, since United States application No. 10/256,428 (Parent application to the instant CIP) was filed more than twelve months thereafter.

OATH / DECLARATION

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: Applicant's claim to foreign priority benefits under 35 U.S.C. 119 is improper, as stated above under paragraph 3 of this action.

SPECIFICATION OBJECTIONS

5. The disclosure is objected to because of the following informalities:
- Due to the aforementioned improper claim to foreign priority benefits, Applicant is required to appropriately update the first paragraph of the specification.
 - On page 5, line 10, "Figure 4B" should be changed to --Figure 5B--, since Figure 4B does not exist in the present application.

Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-19 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter:
- The prior art, alone or in combination, did not show or teach the locking element received by the turbine/turbine housing disposed within the rotary atomizer, wherein the locking element is

Art Unit: 3752

movable to a position to thereby lock the rotary shaft against the turbine/turbine housing in a non-rotatable position, as set forth in claims 1 and 10.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents to Coeling et al., Kwok et al., Rogers, and Yoshida et al., are cited as of interest.

9. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
